(57) **ABSTRACT**

The present disclosure relates to a system and method for collaborative Bill of Materials (BOM) management, said system comprising a user rights based BOM editing module that enables a first user to, based on rights assigned to the first user, edit the BOM, wherein the BOM comprises a plurality of structured fields, each of the plurality of structured fields having at least one defined property. The system of the present invention further comprises a user rights based BOM edit update module that updates at least a second user of the editing done by the first user based on rights assigned to the second user, wherein the rights of the second user are at least for the sections or fields edited by the first user; and a user update based BOM version management module that makes a version of the BOM based on the editing done by the first user.
